Localised renal tumour diagnosis and prognosis in the digitalised era

Poster Session 21

Saturday 10 July
15:00 - 16:00

Location
Virtual Room 8

Chairs
A. Bex, London (GB)
P.F.A. Mulders, Nijmegen (NL)

We encourage you to view the abstracts prior to the session:

• On 8 June abstract bodies will be available for EAU members in the EAU21 Resource Centre.
• On 1 July abstract bodies and 5-minute explanatory presentations will be available for all delegates on the EAU21 Congress platform.

The presentations in this poster session (1 minute in length) are divided into groups, followed by discussion time to address questions from the audience and the chairpersons.

Learning objectives
To explore the innovations in localised kidney cancer diagnosis: preoperative tumour characterization, nephrometry score, 3D reconstruction, and prognostic models

15:00 - 15:01
Introduction

15:01 - 15:19
Renal tumour characterisation

P0593 Cumulative obesity exposure on the risk of kidney cancer: A longitudinal nationwide cohort study

P0594 Accurate differentiation of renal tumour pathological subtypes using a machine learning model of epigenetic markers
S. Rossi, Cambridge (GB)

P0595 A pilot study investigating the feasibility of using a fully automatic software to assess the renal and PADUA score
M. Carlier, Valbonne (FR)

P0596 Computer tomography texture analysis: a promising tool aiding in suspecting clear cell renal carcinoma at pre-treatment imaging
V. Forte, Rome (IT)

P0597 Prostate Specific Membrane Antigen (PSMA) PET/CT ligand uptake across histological sub-types of renal tumours
A. Tariq, Windsor (AU)

P0598 Multiparametric prospective contrast enhanced ultrasound evaluation of kidney lesions: Comparison with histological examination
A. Tufano, Rome (IT)

P0599 Utility of ex vivo confocal fluorescence microscopy for renal mass biopsy optimization
A.S. Valiquette, Valencia (ES)

P0600 PERC-score: a nephrometry score for percutaneous tumor ablation of small renal mass
P. Piazza, Bologna (IT)

P0601 Outcomes of 10 years’ experience of percutaneous cryoablation for the treatment of cT1 renal tumour presented according to RENAL, PADUA and ABLATE nephrometry systems
A. Piasentin, San Donà di Piave (IT)
